JavaScript Essentials 1 & 2

WORK EXPERIENCE

Intern Full Stack Developer - DUDI Software 03/2026 - 06/2026

- Contributed to 3 real-world projects: Cao Nguyen Xanh (company website), Con Dao Trip (tourism platform), and Mon Qua Nho (charity platform) using Node.js, React, and MongoDB
- Developed RESTful API endpoints for core CRUD operations
- Deployed applications to VPS/Vercel, configured Nginx and DNS domain routing
- Worked in Scrum methodology, collaborating with the team across regular sprints

PROJECTS

Website Lun Quiz 1/2026 - Now

Role: Full Stack

- Real-time competitive quiz platform: create rooms, join with a code, PvP 1v1/2v2 with Elo ranking system
- Supports multiple question types (multiple choice, true/false, fill-in-the-blank) with image/video attachments, speed bonus scoring, and server-side anti-cheat
- Built global/weekly/monthly leaderboards, match history tracking, and detailed post-match statistics
- Tech stack: Node.js, React, Express, SQL Server, Socket.IO, Upstash Redis
- Demo: <https://www.lunquiz.site>

English Practice Application 11/2025

Role: Full Stack

- Personalized English learning app with a 4-skill roadmap based on placement test results
- Integrated AI for assignment grading and content recommendations, with Flashcard-based vocabulary learning
- Tech stack: Flutter, Supabase
- Github: https://github.com/Vothanhluan2k4/learning_english

Rental & Boarding House Management Website 06/2025

Role: Full Stack

- Built management features for rooms, room types, amenities, and room images
- Designed room detail view, room filtering, booking, and favorite rooms functionality
- Integrated Momo/VnPay payment APIs
- Applied MVC architecture and Repository Pattern
- Tech stack: ASP.NET Core MVC, SQL Server
- Github: https://github.com/Vothanhluan2k4/QuanLy_PhongTro
